 Phosphates or VOC's
 Noxious or Volatile Fumes

RUST

CCR Restorer is a revolutionary new product that replaces traditional hazardous acid cleaners. CC Restorer formula works with excellent health and safety benefits, replacing hydrochloric, citric, phosphoric, nitric and other DOT hazardous acids. Composed of low pH organic salt combined with a special blend of cleaning agents, this product performs superbly in many cleaning and restoration projects.

Removes: From all types of surfaces

- Tire marks
- Rust Stains
- Efflorescence
- Mineral Deposits
- Concrete
- Decorative Concrete
- Pavers
- * Tub & Tile
- Grout
- Urinals
- Toilets
- And Much More
- Concrete Truck/ Equipment
- Trucks/Vehicles
- Kennels
- Steam Tables
- A/C Coils
- Stainless Steel
- Showers

DO NOT MIX WITH CHLORINE/BLEACH

Application: General Use: For mildly soiled dirty concrete, apply a dilution between 10-1 and 20:1 of CCR Restorer with water either by downstream or pump up sprayer. Pre-mist surface before application for best result. Surface clean area and rinse well to neutralize pH level.

**Always test in inconspicuous area to confirm product and substrate are compatible. Surface must be in sound good condition before starting cleaning/restoration.

MIX RATIOS

- Heavy Cleaning/Restoration..... 1:5
- For medium cleaning/restoration 1:10
- For light cleaning/restoration..... 1:20

Heavy Oil/Grease Spots on concrete: Pre-treat with Bio Clean Multipurpose Cleaner/Degreaser. Apply restorer and allow penetration and dwell time Eliminates 2 step process.

Light and medium Tire Marks on Concrete or similar surfaces: Apply diluted CRC Restorer and clean/rinse off with pressure washer wand or surface cleaner.

Light & Surface Rust Removal: Pre Wet... apply and rinse. Agitate if necessary.
