

ROOF CLING

NEED EXTRA CLING FOR YOUR ROOF CLEANING MIX? WANT A CHLORINE STABLE SURFACTANT THAT WON'T DEGRADE THE STRENGTH OF YOUR MIX?

ROOF CLING adds a copious foaming action to your roof cleaning mix that will keep the chemical where you need it. It decreases run off even on the steepest roof surfaces, allowing the necessary dwell time for the sodium hypochlorite to work on the pesky roof algae. Its easily pourable nature readily blends into your solution with leaving residue, and will not degrade the strength of your roof cleaning solution, allowing larger batches to be mixed ahead of time without compromising effectiveness.
