PRODUCT BULLETIN

BIODEGRADABLE

White Pearl & Foaming Soap

SPECIFICATION

Physical Form	8163 Thick 8164 thin
Flash point (TCC)	Non-flammable
Odor	Lavender or Honey Almond
pH	7 +/- 1
Color	White or Golden
Shelf Life.....	1 year
minimum	
Specific Gravity	>1
D .O.T. Shipping Label	Not required

Hand washing might take a few extra minutes, but it's an easy and really effective way to slow the spread of illnesses like the flu and coronavirus from one person to another or just from touching a contaminated surface. If hands are not cleaned properly, even rubbing your eye can spread the virus. McGee said. "That's why it's important to keep your hands clean." Hand washing is the second best way to prevent getting an infection. It's actually been proven that hand washing helps slow the spread of illness.

How should you wash your hands?

Experts recommend washing their hands for a full 20 seconds to clean off bacteria. They suggest tracking the time by singing. Most people recommend "Happy birthday" or the alphabet song for children.

How often should you wash your hands?

Use common sense. If you're around sick people at all, around children or in public places and you've touched something that other people have touched, then you need to wash your hands. Cold and flu viruses last a surprisingly long time on surfaces: between six and eight hours. Something like the norovirus can live for 24 hours on surfaces. Use a paper towel in public bathrooms to grab the door handle — after washing hands.

DIRECTIONS FOR USE

This luxuriouls hand cleaner may be used in any conventional soap dispenser. (use Foaming in a Foaming dispenser and Thick soap in a conventuional soap dispenser.

Wet hands or skin first and apply a suitable amount of hand soap. Work into a creamy lather and wash for a full 20 seconds to clean off rinse well with clear water. If hands are oily or greasy, a second application may be advisable to insure the protection and the effectiveness.

Refer to SDS for further safety information.
